

Physician & Nephrologist - President of the Renal Association in Mauritius

After studying at the University of Edinburgh Medical School, Davy IP MIN WAN qualified as a doctor in 1993. He then spent 5 years training as a specialist in Internal Medicine and Nephrology in the West Midlands before being appointed as a Consultant Physician and Nephrologist at the University Hospital Coventry and Warwickshire. In 2012, he returned to Mauritius and joined the public sector as a nephrologist at the SSRN Hospital.

He is also a visiting Consultant at Wellkin Hospital and the President of the Renal Association (of Mauritius). He volunteered to be part of the medical team of the JIOI 2019.

DR DAVY IP MIN WAN

Sports Nephrology

Saturday September 4th
Conference Room #1
11:45pm to 12:45pm

After a quick review of how the normal kidneys work, key concepts of kidney disease and its diagnosis, the impact of exercise on kidney health will be considered. Undoubtedly, the practice of regular exercise for most people benefits general and kidney health.

- What does the Sports Doctor need to know about the kidneys?
- How can exercise be associated with abnormal urine and blood tests or even with acute kidney injury and chronic kidney disease?
