KHESAV DEENOO

Foot care

Friday 3rd September
Conference Room #2
11:30am to 12:30pm

When it comes to foot care, it is not the top priority in Mauritians' health list. Having service our locals for the last 7 years, touching thousands of patients, we have noticed that people are not really concerned with problem relating to their feet. Out of sight means out of mind.

We have been educating public, corporates and athletes with the help of our partners on the importance of footcare.

Outcome: The layman realised the impact of foot care and foot problems on their performance and well being.
