MATTHEW GRIFFIN

15X AUTHOR . FOUNDER . HOST . LECTURER . SPEAKER

Matthew Griffin, multi-award winning Futurist has been described as a “Walking Encyclopaedia of the future” and a “Polymath” by NASA. One of the world’s most in demand futurists and leadership coaches Matthew is the Founder of the 311 Institute, a global Futures and Deep Futures advisory firm working across the next 50 years, and is 15 times author of the hit Codex of the Future series.

Matthew is an experienced speaker who has advised world leaders, royal families, all of the G7 and G20 governments, as well as many of the G77 governments on how to navigate the complexities of the next half-century.

A rare talent Matthew has a track record of building and running several multi-billion dollar business units such as Dell-EMC and he has the ability to identify, track, and explain the impacts of hundreds of emerging technologies and trends on global business, culture, and society.

Recent examples include co-developing Accenture’s global leadership program and Pepsi’s global Learning & Development strategy - collectively impacting over 400,000 people, Samsung’s 50 year vision to support their ambition to become a century-lasting global leader, and playing a key role in WPP’s complex global re-structuring program.

Global brands who have listened to his keynotes include Accenture, Coca Cola, Deloitte, Adidas, Disney, EY, Google, KPMG, Lego, LinkedIn, Microsoft, PepsiCo, Qualcomm, Samsung, and Visa, amongst others.

Matthew Griffin has spoken at the UN numerous times and in 2023 was the only futurist invited to address the COP28 conference in Dubai.

OVERVIEW & KEY OUTCOMES

This conference is a strategic, executive-level experience designed to provide clear, practical insight into how Artificial Intelligence is reshaping industries, organisations, and leadership itself.

It is a guided journey that moves participants from awareness to clarity and from curiosity to informed action. Attendees will gain a structured understanding of what AI truly means for their profession, their organisation, and their future.

The day begins by examining the global transformation driven by AI, separating hype from reality and exploring why every sector, not only technology, is being fundamentally reshaped. Drawing on international insights from futurist Matthew Griffin and local perspectives from industry experts, the conference contextualises AI within the Mauritian economic and workforce landscape.

Participants will then experience AI in action through live demonstrations and real-world case studies, showcasing how organisations are already enhancing productivity, strengthening decision-making, improving customer experience, and increasing competitiveness through practical AI implementation.

Interactive panel discussions and extended Q&A sessions provide space to address the most pressing concerns:

- What happens to jobs?
- Which skills will define future relevance?
- Where should organisations begin?
- How can individuals remain relevant?

By the end of the conference, participants will leave with:

- A clear and grounded understanding of AI and its practical impact
- Real-world examples applicable across sectors
- Strategic guidance on organisational preparedness
- Personal insights on adaptation and long-term relevance
- The confidence to approach AI as an opportunity, not a threat

The experience concludes with structured networking designed to transform insight into collaboration and concrete next steps.

This conference is designed for decision-makers, professionals, educators, entrepreneurs, and students seeking to understand the future early enough to shape it.

AGENDA

08:30 AM – 09:00 AM | Registration
